

DIVINE TECHNO SYSTEMS

SMART HOME AUTOMATION

Our Story

Everything we do we believe in providing the best value to our customers. The way we provide the best value is by hiring the best people possible in our team and imparting innovation, integrity, ethics and respect. We just happen to be the best out there.

This company was found 14 years ago and till then we've seen an upward curve in the company's growth. In these years we've serviced hundreds of companies and have been successfully able to build trust with them. In such a competitive market we've flourished for 12 years and still are doing great because of the core values of our company.

WHAT WE OFFER?

SMART CONTROL

Easy Integration and Configuration

Get rid of individual remotes to control separate appliances. Integrate and Control devices across brands and applications under a single remote or smartphone for one-touch control.

Create Intelligent Scenes and Schedules

Creating scenes and set schedules to trigger multiple devices at a time during specific time of the day. Let your home welcome you after a busy day at work.

Easy Integration of Devices for One-Touch Control

Get rid of using separate remote for each of your home appliances. Integrate several devices like music player, ACs, TVs, Lights etc. and control it with a single remote and easy-to-use smartphone app.

AI Voice Control

Control Your Smart Home devices through Voice Commands

Control most of your Smart Home appliances either individually or in pre-set themes just over your voice commands. Speak the trigger word and get things done.

Stream Music Directly from your Smartphone

Just pair your smartphone to the Amazon Echo over the Bluetooth and play music on-the-go over the Echo. Control your playlist, change tracks, set volume just with voice commands.

Ask almost anything and everything

Your Amazon Echo is your on-the-go encyclopedia. Know about the latest news, set reminders for your daily activities, never miss on schedules, get valuable suggestions and much more.

Smart Lighting

Infinite Colours

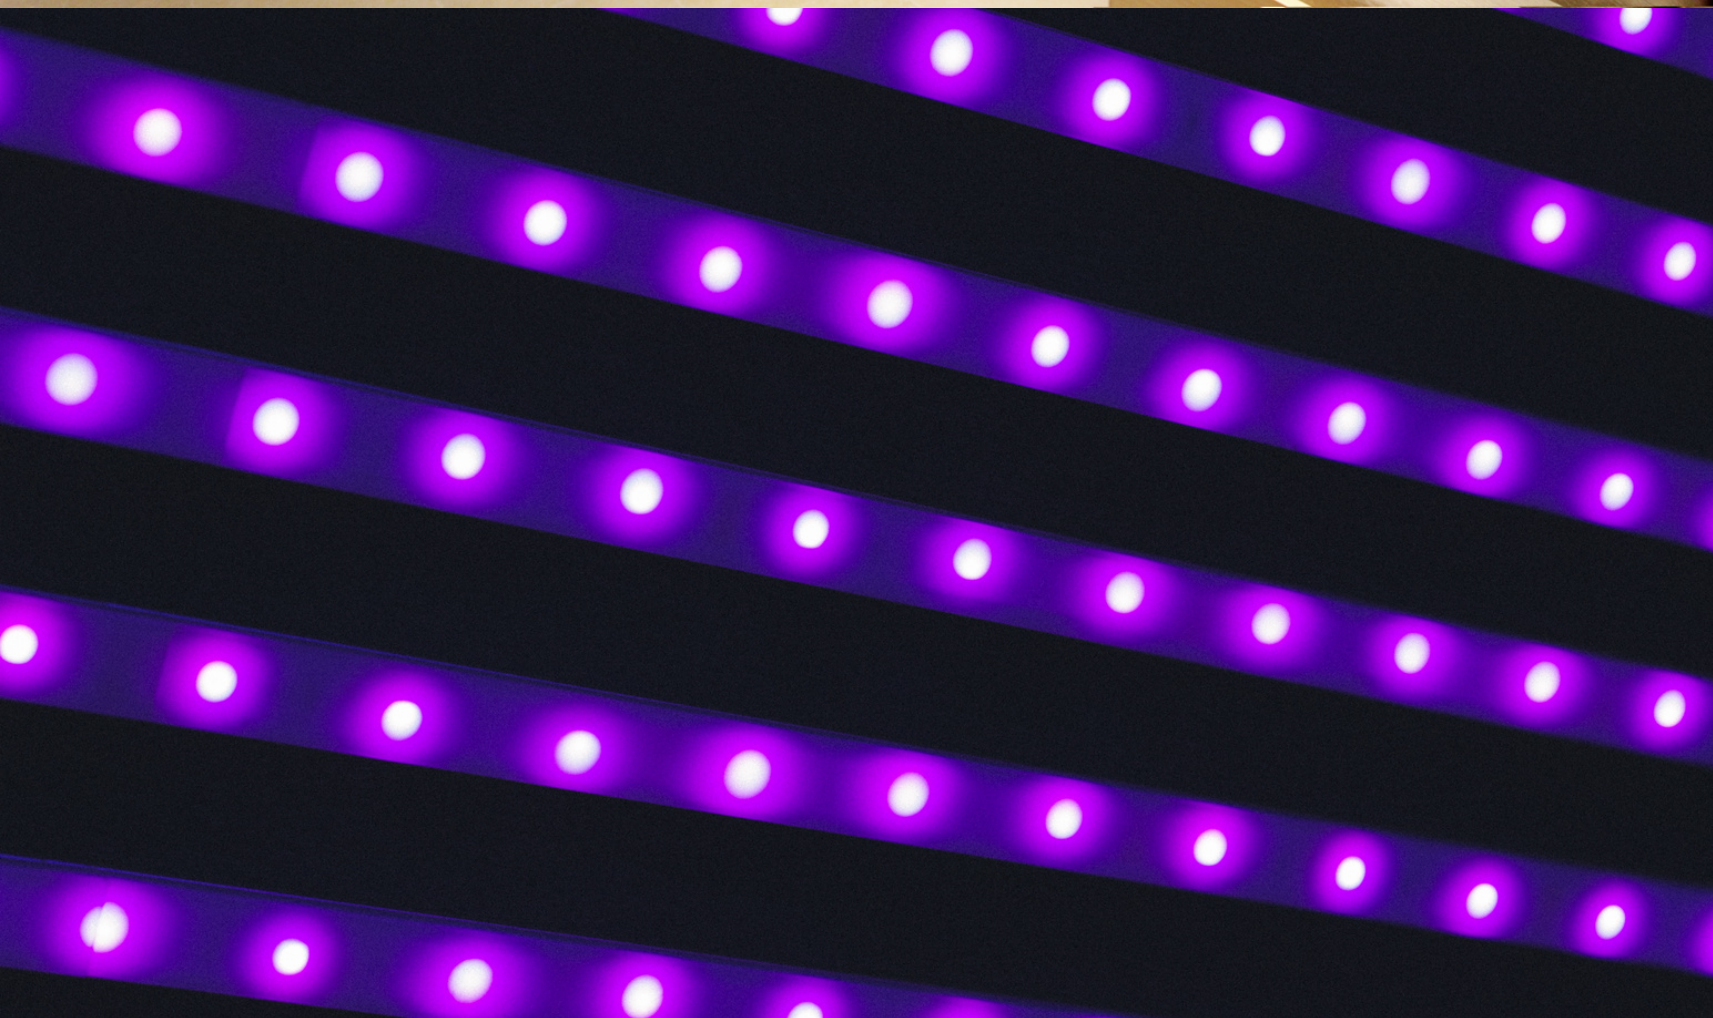

Based on your mood or time of the day, you can customise your lighting by selecting between a range of 16 million color shades.

Control From Anywhere in the World

Control or set lighting sequences from anywhere in the world. You can even configure and emulate presence activation scenarios, to give an impression that you're home.

Connect with other Smart Home Devices

Your smart lighting takes inputs from compatible smart home devices and intelligently reacts to events.

Security System

Unlock Your Doors From Anywhere

Remotely control your door locks from anywhere in the world. Give instant access to surprise visitors and your dear ones.

Instant Alerts and Notifications

Get instant alerts on your mobile device in case of any security breach. Raise instant alarms and take the necessary corrective action.

LIVE HD Streaming and Recording

Instantly stream live videos right to your smartphone to know what is happening within and outside your house.

Safety

Smoke and Gas Leak Notification

Smoke and Gas Leak sensors trigger local alarms and Smart App notification. They can also be monitored centrally for entire buildings.

Instant Panic Button

Get instant alerts on your smartphone in case of any security breach.

Smart Climate Control

Set the right temperature

Turn on your AC minutes before you reach home from a tiring day at office. Monitor the room temperature and set the room temperature based on the climate conditions for optimum energy use.

Smart Control Based on Climate Changes

Turn on home lights in case of dark clouds coming in and reduction in ambient light. In case of rains, turn off garden water sprinklers by sensing the soil moisture.

Smart Learning

The Smart Controller learns your usage patterns based on your daily routines over the course of time and triggers other smart devices/appliances automatically.

Smart Sound System

Effective Audio distribution in all rooms

Connect all your speakers across rooms to play the same music or stream different music in each room as per your convenience and need.

Immersive Smart Home Audio Experience

Stream your favourite playlists and tracks directly from your smartphone to all the wireless Hi-Fi Sound Speakers and create the best audio experiences for yourself. Integrate speakers to play the same music across every room of your home or play different tracks for different speakers.
